EDUCATION

UNIVERSITY OF PATRAS | 2016-PRESENT

Department of Computer & Informatics Engineering

Bachelor's thesis : Design and implementation of a Recurrent Neural Network (RNN), trained with the Back-propagation Through Time algorithm and used for exchange rates prediction.

Internship in algorithmic trading.

SOFT SKILLS

- Team player
- Goal oriented
- Adaptable
- Challenge driven
- Critical thinking

LANGUAGES

- Greek (Native)
- English (B2)
- French (B1)

Stelios Azis

- Software Engineer -

PROFILE

I am a results-driven engineer with a keen interest in facing and overcoming technical challenges. With a background in algorithmic trading through a hands-on internship, I bring real-world experience to data-driven problem solving. Furthermore, I am a highly organized and coachable individual with strong analytical and leadership skills. Finally, I look forward to working with experienced software engineers to further enhance both my technical and non-technical abilities.

COMPETENCIES

- Python
- JavaScript
- MySQL
- C ++

PROJECTS

Machine learning / Data Mining - Classification and Prediction model on renewable resources real data | 2022

- C++ / Java : Online shop | 2017

- Web project : Javascript/MySQL/Html/Css

- Prediction Model on Stock price

- Prediction Model on Crypto Data

COURSES

- Object-oriented programming
- Data Mining
- Linear algebra
- Finance for engineers
- Machine learning - Deep learning
- Udemy Python course
